

4th Grade STA Math

April 6th - April 9th

Dear Students,

I pray you are all staying healthy. I hope you have had a wonderful spring break! This week we are going to try something new, if it doesn't work do NOT WORRY! It is ok and I will make any adjustments needed. We are going to be using Khan Academy for part of our math work. I have sent an email to each of your parents letting them know your **username and password**.

There are some concepts that we have covered in class before, but I would like you to have more practice and information provided to you. I am asking that each of you spend your math time working on and completing the *Multiplying Fractions* Unit in Khan Academy. I think you can get this completed over three days, but I understand, since we have never done this before, it may not be possible. I also understand that you may not have access to technology that would allow you to complete this work. If this is the case, PLEASE have your parent send me an email, we will figure this out together. 😊

Multiplying Fractions Unit is broken down into three different lessons. For each lesson there are videos to watch (these are VERY helpful to successfully complete the exercises), some problems to solve (exercises), quizzes and a unit test after completing all three lessons. I can see what you have completed and how well you did on the problems (exercises), quizzes and unit test. I am thinking that each of these lessons will take less than 20 minutes to complete, since we have never done this it may require more (or less) time. I will be monitoring your progress and I plan on touching base with your parents during the week to see how you all are progressing.

Please go to <https://www.khanacademy.org> to begin working on these lessons.

1. Click login
2. Enter Username
3. Enter Password
4. Click on Assignments -it should take you right to your first lesson
 - a. You may skip videos and go straight to the exercises
 - b. If you need help, click the hint button or watch video button
 - c. If you answer incorrectly it is ok, click on the button to find out what you did wrong.
 - d. Take the quiz at the end of each lesson

It may take 10 minutes for your progress to show up in your account. Remember email with ANY questions or concerns. I look forward to touching base with you and watching your progress.

- Math-**
1. Read
 2. Fill in notes
 3. Solve problems for each of the following lessons:
 4. Check off as you go ✓

	Read	Took Notes	Practice Set and Odds
L.85- Converting Units of Capacity	Pgs, 444-445		PS A-D, # 2-30 evens
Khan Academy – Multiplying Fractions Unit https://www.khanacademy.org Username Password Are required to begin working on this unit	Begin work in Khan Academy spend 20-30 minutes on the assigned Multiplying Fraction unit. Since this is new, email me if you find this time frame or task too frustrating, challenging or you are unsure. Complete Multiplying Fractions Unit Due on Thursday, April 9. (I am flexible on this due date. Please let me know if your child is struggling.)		
L86 – Multiplying Fractions	Pgs. 448-449		PS A-F, 1-29 odds
Extra work	Work on 500+ piece puzzle, 6 or 9 Frame Sudoku, board game, logic puzzles, Math Facts		

Do not use a calculator, just your beautiful mind! Many blessings and continue to pray for everyone. I miss seeing you all and teaching you every day!

Blessings,

Mrs. Elshaw
